## SILVERDAT VEHICLE VALUE TRACKER

SilverDAT Vehicle Value Tracker	
Scope of service	SilverDAT Vehicle Value Tracker
Version number	10.2023.0.1
Short description	<p>SilverDAT Vehicle Value Tracker is a tool for analysing residual value developments of various vehicle models from different manufacturers. The following analyses can be performed using the Vehicle Value Tracker:</p> <ol style="list-style-type: none"><li>1. Development of dealer purchase prices (HEK)</li><li>2. Development of dealer selling prices (HVK)</li><li>3. Development of listed original prices (LNP)</li><li>4. Development of residual value predictions (RWP)</li><li>5. Development of residual value predictions based on HEK</li><li>6. Evolution of residual value predictions based on HVK</li></ol>
Limitations	<p>The user is given the opportunity to exclude any data points in order, for example, to be able to carry out data smoothing. DAT assumes no responsibility for the resulting changed presentation of the data.</p> <p>The data visualised through the licensed product may be used only for the analysis of residual value developments and business processes directly associated with these purposes. No other usage is permitted.</p> <p>The data displayed within the Vehicle Value Tracker does not fully reflect the entire used vehicle market. All analysable data is based entirely on the applications of DAT which are available to the market.</p> <p>Within the Vehicle Value Tracker, only residual value predictions of vehicles that are not older than six years are mapped.</p>
Access/installation	<p>Use of the licensed product requires an agreement to be in place regarding the SilverDAT data and information system. The system requirements for SilverDAT applications - available at <a href="http://www.dat.de/silverdat/systemvoraussetzungen">http://www.dat.de/silverdat/systemvoraussetzungen</a>- also apply.</p>
Documentation	Manual available as PDF in the user interface.
