

Manufacturer paintwork for MG, issued June 2024
(only for warranty and transport damage)

- 1. Paint types – paint level classifications**
- 2. Preparation times**
- 3. Material calculation**
- 4. Colour matching**
- 5. Triple-layer paint**
- 6. Miscellaneous**

1. Paint types – paint level classifications

- Double-layer paintwork → DAT-Paint type 09,12
- Triple-layer painting → DAT-Paint type 16,17,32

Part Type	Paint level		Paintwork type
	DAT	Manufacturer	
Assembly part / weld part	1	Surface	Surface / topcoat
Assembly part / weld part	2,3	Rep.-Paint	Repair
Assembly part / weld part	4	New part	New part

2. Preparation times

MG specifies a separate preparation time. This is not dependent on the type of paint and the paint level for the parts to be painted. The amount of preparation time depends exclusively on the component size (normal part, small part). There are no additional preparation times for painting plastic parts.

3. Material calculation

The material is calculated as a percentage of the wage or as a lump sum requirement. The percentage of wages granted by the manufacturer (in the event of a warranty claim) is 35%.

4. Colour matching

The preparation times include the work for the colour mixing system and colour test panel.

5. Triple-layer paint

MG does not provide any specifications for a Triple-layer paint.

6. Miscellaneous

The MG manufacturer system is only to be used for warranty and transport damage.

The work time for painting welded-on new parts not includes painting the connection points on the adjacent parts.
